

Environmental Policy

Chas Storer Ltd is an independent company based in Potters Bar, Herts. We specialise in the collection and recycling of waste paper, with our main aim is ensuring as much waste as possible is recycled. We will seek to offer our expertise in recycling of paper and other materials, to customers who wish to recycle and reduce the amount going to landfill.

We are committed to achieving the highest possible standard of environmental management, to prevent pollution, and to comply with all relevant environmental legislation and regulations. Our business will be run in a professional and responsible manner. It will reflect our commitment to the health and safety of employees, and the service we provide to our customers.

Our site will be designed and operated to fully incorporate measures to protect and improve the environment. Any sites at which the company takes over operations will be assessed for environmental risks and a program of continual improvements will be drawn up and implemented to reduce and minimise any identified risks. The risk assessments will take account of the potential to pollute the waste types handled, the materials used, and the activities conducted within the business. Chas Storer Ltd is committed to and will ensure continual improvement of all its activities, prioritising those with greatest potential environmental impact.

We will continually assess our environmental performance against our procedures, and agreed objectives and targets. New investments in plant and operations will incorporate the best available environmental techniques that are commercially viable. We will continue to work closely with all appropriate external authorities to meet all regulatory and legislative requirements. Resources will be made available to achieve these aims. All employees will be required to partake in training program that will improve environmental and safety awareness, and ensure all instructions and procedures are communicated and complied with.

We will encourage participation in the system to ensure that these high Standards are met, maintained and improved.

Signed
